### High level objectives
Improving clinical services, quality of life and empowerment through ICT

- RENEWING HEALTH aims at improving the quality of life of chronic patients suffering from diabetes, COPD or cardiovascular diseases by removing anxiety about health conditions and reducing the need to use emergency services and hospital stays.
- RENEWING HEALTH will provide coherent clinical services through Information and Communication Technology (ICT) that take into proper consideration patients’ and professionals’ needs, capabilities, risks and benefits. The service solutions will support the empowerment of the patients and increase patients’ satisfaction.
- RENEWING HEALTH implements a new healthcare model that is expected to reduce the cost of chronic patient care by reducing the reliance of these patients on the expensive facilities geared to tackle only the acute episodes of the chronic disease.
- RENEWING HEALTH intends to create an organisational model for telemedicine services that ensures a safe, clear and efficient pathway for patients in their journey through the healthcare system.

### Consortium

**Veneto Region - Italy**  
**Region Syddanmark - Denmark**  
**County Council of Norrbotten - Sweden**  
**eHealth Innovation Centre, EIC - Lulea Tekniska Universitet - Sweden**
