

Venue

Med-e-Tel takes place at Luxexpo, a modern exhibition and conference facility with direct access to the European motorway network, and just minutes away from the Luxembourg city center and airport.

Luxembourg city itself has many wonderful things to offer as well. After a hard day's work, be sure to make the most of your stay. Luxembourg has something for every taste and every occasion. For information about the city, visit www.lcto.lu.

Hotels

Special hotel conditions have been negotiated for your stay in Luxembourg. Information and reservation facilities are available at www.medetel.lu.

Social Events

Join us for the Welcome Reception at the beautiful Abbaye de Neumünster in the city center on the first evening of the event and the Exhibitor and Attendee Reception at Luxexpo on the second day of the event. These social events have proven to be highly valued and successful at past editions of Med-e-Tel and allow for great networking in an informal atmosphere.

Here is what some past Med-e-Tel participants have to say:

"Med-e-Tel is an excellent opportunity to network intensively with people who are passionate and convinced about the future of eHealth."

"Med-e-Tel can be highly instrumental in setting the standards for healthcare. It provides for a platform which eventually will create de facto and efficient solutions."

"The right people are here."

"As a premier international event for eHealth and Telemedicine, Med-e-Tel offers the opportunity to harvest synergies for successful business partnerships between international players."

"We were impressed by the high level educational programs. Contacts established with companies and organizations have been extremely useful."

Telemedicine and eHealth on the rise

Telemedicine and eHealth markets are at a critical growth phase. National health IT programs are being planned and implemented, and cross border initiatives take root. International projects are opening the way towards sustained telemedicine and ehealth development. Also the number of individual initiatives by hospitals, homecare agencies and private practitioners to implement health IT strategies is on the rise.

Med-e-Tel focuses on a wide range of health ICT applications and on the convergence of information and communication technology with medical applications, which lead to higher quality of care, cost reductions, workflow efficiency, and widespread availability of healthcare services

In a professional and business-minded environment, Med-e-Tel brings manufacturers and suppliers together with healthcare service providers and other key contacts such as representatives from local government and international organizations, insurers, consultants and researchers for the purpose of establishing new trade contacts, developing existing relationships and sharing information.

The event also features many educational opportunities through its extensive program of presentations, panel discussions and satellite conferences.

As an ISfT supported event, Med-e-Tel is attended by professionals who represent their country's leading telemedicine organizations. Also European Commission, and WHO, ITU and other UN agency officials participate at Med-e-Tel to provide information about their ehealth activities and to look for partners.

Who attends?

Past Med-e-Tel attendees have been coming from around the world:
