

EHR Systems Quality Labelling and Certification

Overview

Key speakers at the Conference will comprise high-level representatives of the Ministry of Health of Serbia, European Commission, EuroRec Institute, WHO, IHE, ProRec-Serbia, ProRec-Slovenia, Serbian hospitals and certification bodies, European research centres, as well as representatives of the industry.

Opinion makers and experts from Ministries of Health (or other formal authorities) from the South-East and Central European region (18 countries) will participate in a round table debate.

High-level representatives from the invited countries and interested actors will take part in the Conference.

Two-day Conference will provide an opportunity to:

- get a first-hand insight into international EHR system Quality Labelling and Certification developments/status (including outcomes from the EHR- Q^{TN} project, supported by the European Commission)
- participate in the round table discussions
- contribute to drawing conclusions and making recommendations for EHR systems Quality Labelling and Certification for the region.

Organisation of the Conference

- Ministry of Health of Serbia / Serbia Health Project - Additional Financing (financed by the World Bank)
- EuroRec Institute

Supported by:

- ProRec-Serbia
- ProRec-Slovenia
- EHR-Q^{TN} Project (supported by the European Commission)

Location and Accommodation

Conference is taking place at the Hotel Continental Belgrade.

Rooms in this hotel are reserved at special rates for the Conference participants.

EHR Systems Quality Labelling and Certification

A word from the Minister

Offering the best possible and affordable care to its population is the main objective of all governments in Europe.

Electronic Health Record systems has proven to increase quality and efficiency of care by increasing adherence to guidelines, enhancing continuity of care, decreasing medical errors and improving efficient use of resources. Analysis of thus obtained information provides responsible health policy carrying out and competent decision making at all levels of health care.

The health added value and the economic value of health IT applications in general and more especially of EHR systems depends on the intrinsic quality of the applications, the way they interact with other application and their professional use.

Quality Labeling and Certification is the way for health authorities to define that required quality, improving system procurement of reliable, trustworthy and interoperable EHR systems.

We look forward to seeing you in our beautiful city of Belgrade, to enjoy a few special days with friends and experts from the region.

Prof. Dr. Zoran Stanković
Minister of Health of Serbia

Goal of the Conference

To exchange experiences, to stimulate and to inform health care authorities and interested professionals on EHR systems Quality Labelling and Certification issues.
